Pricing effective 7/1/2019
Fee includes:
water system development charge,
water meter, and
meter installation fee.

DETERMINING METER SIZE FOR RESIDENTIAL CUSTOMERS
City of Tigard Water Service Area uses the American Water Works Association Manual and the Oregon Plumbing Specialty Code to determine the size of meter needed to adequately serve buildings. Due to the variety of home sizes built in the Tigard area, we count the fixture units of all homes to determine the appropriate meter size.

Use the worksheet on Page 2 to calculate the current number of fixture units compared to the proposed increased number of fixture units, which will determine whether an increased meter size will be required.

Submit this signed worksheet with your building or plumbing permit application submittal.

DOCUMENTATION
Once you are ready to purchase the new meter, please provide the following items to the Utility Billing counter:

- Completed water meter fixture unit worksheet for additions, remodels, ADUs, etc. (on back page).
- Copy of building or plumbing permit application date-stamped by building division.
- Copy of issued building or plumbing permit.

Your fixture count will be verified and your request will be processed upon receipt of these documents. No exceptions.

INSTALLATION TIME
Once the upgraded meter size has been purchased, please contact Public Works for installation. Their number is 503-718-2591. Most meters are installed within 10-14 business days.
Water Meter Fixture Unit Worksheet for Additions/Remodels/ADUs

Please complete the following information:

Customer Name: ________________________________

Service Address: Street/Suite #: ___________________________

City: ___________________ State: ___________________ Zip: ___________________

Phone Number: ___________________ Email: ___________________

Please fill in the number of each fixture you currently have. Multiply the quantity by the point value to arrive at the current total.
